

Initialisation Machine E-C25S

Introduction

The encoding and sorting machine is used to encode or sort large batch of ticket for ticketing center of metro company or card issuer, E/S can provide pre-issue function, it can configure the parameter based on ticket type according to requirement, and upload the information to ACC.

Production feature

- Support all contactless smart card of ISO14443.
- Equipped touch screen and reporting printer.
- Using alternative supplementary with dual issue bin, high speed for sorting.
- Preventing belt abrasion, avoid rubber adsorbed on the ticket surface.
- Open and modular design, easy for assembly and maintenance.

Specification

Encoding speed	6,000 per hour
Sorting speed	7,200 per hour
Issue bin	two bin, each ≥ 750
Recycle bin	four bin, each ≥ 750
Invalid ticket bin	one, each ≥ 750
Operating screen	19" LCD
MCBF	$\geq 100,000$
MTTR	≤ 30 min
Power	AC220V $\pm 20\%$
Dimension	1,400mm (L) * 540mm (W) * 1,650mm (H)
